

Noesis

Your Product Engineering Partner

Company Overview

About Us

- An engineering partner focused on providing innovative solutions for small and medium businesses
- Offering high quality, low cost product engineering services (development, testing, end of life services, sustenance etc)
- Providing sales and marketing services for Indian market.

Industry Focus

- Software Products – Security, financial & accounting, manufacturing & retail, system software, education software...
- Mobile Applications...
- Custom software solutions for specific industry need – Reporting, testing, localization, connectors...

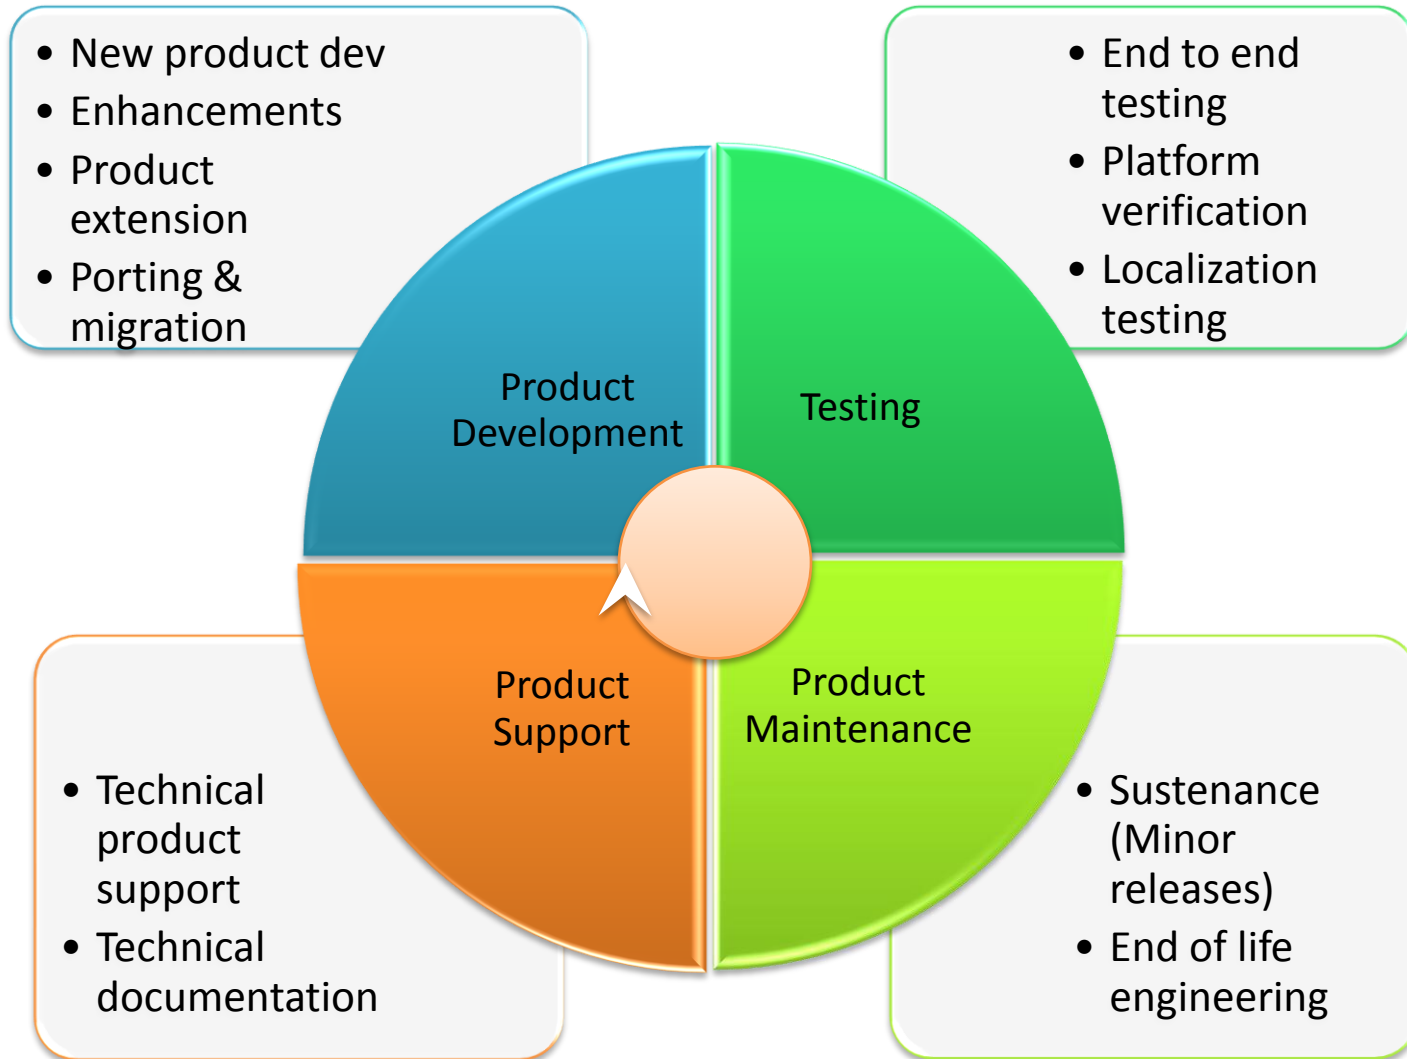

Offices

- Offices in US & India
- US Contact Number: +1-888-246-5023
- India Contact Number: +91-99026-18030

Team

- Manish Singh, Founder & CEO
- Sujay Viswanath, Co-founder & Chief Sales Officer

Product Engineering Services

Product Development Services

Enabling faster time to the market for innovative products

- New product development and enhancements
 - Taking requirements document to develop full-fledged product
 - Product enhancements like new feature addition and connector development to support 3rd party products
 - New product development and platform modernization services using technologies like Web 2.0, .NET, J2EE
 - Flexible development processes like Agile, Iterative and Waterfall methodologies based on client requirements
 - Offering early to market advantages
- Product extension and Porting- Migration
 - Extending your product to other industry verticals
 - Extending your product different geographies
 - Extending the product for new markets through SaaS model
 - Porting/ migrating to new platform

Testing Services

Improving product quality

- End to end testing
 - Functional testing: integration, regression, system, GUI validation, API for software products and mobile applications
 - Test cycle reduction through proven methodologies, automation frameworks, tools and processes assuring:
 - Test cycle time reduction by upto 30%
 - Product quality improvement by up to 25%
 - Significant cost reduction as high as 50%
- Platform verification
 - Testing and verification on Windows platforms, Unix/ Linux platforms, mobile platforms etc.
- Localization testing
- Test factory
- Performance and benchmark testing

Product Maintenance Services

Optimizing maintenance cost

- Sustainance engineering
 - Enhancements, bug fixing, patch releases
 - Product portfolio management through shared sustainance model reducing total cost of sustainance ownership
- End of life engineering
 - Full ownership of legacy products thus freeing up locked-in resources and budgets for next-gen product development
 - Extending shelf life of your products in Zero-cost model thus retaining the installed customer base and maintain existing revenue stream
 - Legacy product modernization services

Product Support Services

Enhancing end customer experience

- Technical product support
 - Technical product support agents – specialists skilled in product interoperability perform complex incident replication and problem resolution. This includes environment management, knowledge management, problem management, functionality testing, release & implementation consulting and report generation
 - Deep product support agents – senior customer service agents with deep product knowledge perform detailed technical consulting to resolve client problems. This includes complex problem management, knowledge management, product engineering sustenance and bug fixing, release management, escalation management, service level management, customer management, and support project/program management to include training
- Technical documentation
 - Product and technical documentation
 - Documentation Support
 - Document re-engineering
 - Illustrations and graphic design
 - Reverse engineering documentation support
 - Content publishing / portal management
 - Migrating to new standards and templates
 - Training & Education Materials

SaaS & Cloud Services

Tapping new revenue opportunities

Technology Consulting

- Architectural assessment
- Re-engineering, Virtualization roadmap for applications
- Cloud service providers integration & deployment roadmap

SaaS Engineering

- Reengineering, enhancements, testing
- Integrating with other enterprise apps – security, IDAM, billing, payment gateways

Cloud Services

- Integration/ deployment on cloud platforms
- Testing services for cloud deployment
- Infrastructure management services for cloud deployment (Security monitoring, upkeep and maintenance).

Why Noesis

- We have solution accelerators & ready to plug-in frameworks and methodologies
- Testing frameworks for consumer products, SaaS & cloud platforms
- Providing low cost quality solutions using test factory, shared sustenance model
- Reducing time to market using agile methodologies, technology frameworks etc.
- Strategically located at Silicon Valley of India (Bangalore)
